

EXECUTIVE SUMMARY (FRONT SIDE) - ENGLISH VERSION

WE DON'T NEED CHARITY. WE NEED CO-CONSPIRATORS.

Virgin Unite + our rebel crew will co-design 8 living labs across Africa that turn scarcity into abundance: water from playgrounds, teachers that roar, salads from rooftops, drones that save lives.

Project (Original Title)	"Holly-Voice" Title	90-Day Win (Metric)	Story Asset (Viral Ready)
AI Inclusivity	1. Autism-AI Buddy	500 atypical kids move up 1 reading level.	Non-verbal child high-fives tablet as avatar-lion roars the alphabet.
Africa Education	2. Grandma-Avatar School	1,000 rural teens build a working solar lantern.	Photo: Class projector powered by bike dynamo, kids holding lanterns they built.
Zero-E Hydraulics	3. Tree-Seesaw Water	3 ha of maize irrigated 0 kWh, 30% yield jump.	10-sec clip: kids on seesaw, water gushing into trough.
Ethical Training	4. Orange-Bench Ethics Lab	100 drop-outs earn micro-certificate, 70% placed locally.	Carousel: Before/after hands, shiny tools engraved with owners' nicknames.
Passive Mapping	5. Night-Vision Crop Tattoos	5,000 ha monitored nightly, 80% faster drought alert.	Satellite gif: field lights up like fireflies when water stress hits.
Eng. Validation	6. Lego-Valley Test Track	4 village micro-hydro projects green-lit without costly surveys.	Time-lapse: Paper model → 3D print → real turbine spinning in miniature river.
Health Drones	7. Naelia Sky-Angel	12 lives saved in 90 days, avg. response 18 min vs 3 h road.	Map: Straight red drone line vs winding brown road, heartbeat emoji.
Micro-Food	8. Circle-Food Pod	200 kg lettuce/month in refugee camp, zero food miles.	Photo: mother serves salad, kid points at drone-photo of same roof.

Details and Strategic Closure

90-DAY WINS (METRICS):

We will establish 12 pilots, impacting 20,000 people, achieving a 50% cost-down on energy/logistics, and 100% fun-up. Metrics include: 12 lives saved (Naelia Drones), 500 children up 1 reading level (AI Buddy), and 30% yield jump using zero-power irrigation (Tree-Seesaw).

NOTE ON EXISTING PARTNERSHIPS (HOT-OSM Hook):

Our Night-Vision Crop Tattoos (zero-power IR markers) plug straight into the OpenStreetMap datasets already used by Virgin Unite's partner HOT-OSM, turning static maps into live, night-and-day dashboards—no new platforms, just exponential extra value for the data volunteers you already champion.

NEXT STEP: 3-DAY PURPOSE SPRINT

Let's meet on Necker, bring the prototypes, and co-design the system. **Ready to Rebel?**
